About Me

- **10+ years** of experience in **iOS software development**.
- **Extensive experience** with **Swift** and **Objective-C** programming languages.
- Experience in developing mobile applications using **UIKit** and **SwiftUI**.
- Experience in building and maintaining modular architectures using **Swift Package Manager (SPM)**.
- Experience in taking an iOS product from **MVP to App Store**, including architecture, delivery, and release readiness.
- Experience in integration with **REST APIs** and real-time services (**WebSockets**).
- Experience in integrating Apple services and security features (**Apple Pay**, **Keychain**, **Face ID / Touch ID**).
- Experience in developing Apple Watch companion applications (**WatchKit**, **WatchConnectivity**).
- Experience in implementing location, maps, and navigation features (**MapKit**).
- Experience in working with device communication and media features (**Bluetooth**, **AVFoundation**).
- Experience in writing and maintaining **unit tests** and **UI tests**.
- Hard-working, highly motivated to learn new things, and a strong team player.
- **Interests:** exploring applied AI—testing different models and agent workflows on small sandbox projects; experimenting with automation and tooling to speed up delivery.

Skills

Core: Swift, UIKit, SwiftUI, Swift Concurrency (async/await)

Product & real-time: WebSockets, Apple Pay, Firebase, Remote Config

Platform & modularization: SPM, modular SDKs, feature boundaries, MVVM-C, MVP (Presenter), DI, Auto Layout, URLSession, REST APIs, XCTest, Keychain, LocalAuthentication, AVFoundation, WatchConnectivity, CoreBluetooth

Languages

- **English** — B2 (Upper-Intermediate).
- **Ukrainian** — Fluent.
- **Russian** — Native.

Experience

Newest first

- **GlobalLogic** Kyiv, Ukraine

  Senior iOS Engineer · Jan 2026 – Present

  PROJECT: **Apple Watch AI-assistant companion**

  Built an Apple Watch companion app for a corporate AI assistant concept for field equipment repair, focused on watch–phone connectivity and audio streaming. Delivered an internal TestFlight build for customer validation.

  - Built a bidirectional audio pipeline with watch playback via AVPlayer.
  - Rendered structured AI responses for hands-free field workflows.

- Aligned requirements with watchOS constraints (background execution, connectivity, audio sessions).

- **PASHA HOLDING** Baku, Azerbaijan · Kyiv, Ukraine

  Senior iOS Engineer · Apr 2022 – Jan 2026

  PROJECT: **Umico / Birmarket — marketplace & shared SDK ecosystem**

  Worked on Umico/Birmarket, a marketplace with a loyalty program delivered as both a standalone app and shared SDK modules integrated into multiple host apps. In a multi-squad, cross-functional environment with 7–10 iOS engineers, I owned Premium Subscription within the loyalty domain and contributed to SPM modularization, shared SDK APIs/theming, SwiftUI delivery, and release safety through Remote Config and staged rollouts.

  - Led SPM modularization and built a shared marketplace/loyalty SDK with multi-brand theming and stable public APIs, integrated into Birmarket, Birbank, and M10.
  - Led Premium Subscription end to end, from requirements to rollout, including localization; contributed via code reviews and mentoring.

- **Dodo Engineering** Kyiv, Ukraine

  iOS Engineer (Mid-level+) · Feb 2020 – Feb 2022

  PROJECT: **Drinkit — coffee ordering app**

  Worked on Drinkit, a mobile app for an offline coffee chain focused on ordering, loyalty, sign-in, and drink customization. As one of two iOS engineers in a cross-functional team, I handled end-to-end delivery across ordering and customization flows, contributed to the modular foundation, and shipped multiple App Store releases.

  - Delivered core ordering flows; designed an SPM-based modular SDK with a Presenter-driven MVP architecture.
  - Integrated Apple Pay and loyalty rules; implemented live order tracking with WebSockets + fallback polling.

- **Solvve** Kyiv, Ukraine

  iOS Developer (Mid-level) · Jan 2019 – Feb 2020

  PROJECT: **PLAYHERA — esports & gaming tournaments**

  Worked on PLAYHERA, a tournament platform with complex flows for brackets, scoring, standings, and live match updates. In a multi-squad, cross-functional setup with 2–3 iOS engineers per squad, I delivered UIKit tournament surfaces, real-time update pipelines, and resilience for reconnect and stale-state scenarios.

  - Implemented tournament flows (brackets, scoring, standings, chat, leaderboards) and dense UIKit screens for rosters and player profiles.
  - Delivered realtime updates over WebSockets + Combine, handling disconnects, retries, and stale UI state.

- **Electus** Kyiv, Ukraine

  Company profile (DOU)

  Lead iOS Engineer · Jul 2018 – Nov 2018

  PROJECT: **Electus — crypto market info & wallet MVP**

  Worked on an early-stage crypto wallet MVP designed to simplify receiving and transferring cryptocurrency for non-crypto users. As the primary iOS engineer in a two-person team, I led architecture and MVP delivery, mentored a junior engineer, and owned key product flows, secure storage decisions, and release readiness.

  - Led architecture and delivery of an MVP combining market information with wallet-oriented flows; shipped the first MVP version.

- **GBKSoft** Kyiv, Ukraine

Company website · LinkedIn

iOS Developer · Jun 2017 – Jun 2018

PROJECT: **Eastern Union, Clovis Culture, iBeacon client app**

Worked in an agency environment across multiple client apps covering trading-style finance UI, e-commerce flows, and BLE/iBeacon proximity experiences. In a cross-functional team of 2–3 iOS engineers, I delivered features across projects, supported releases, and shipped MVPs and updates.

- Trading and commerce apps with live data, caching, and smooth UI under load; App Store ownership.
- Bluetooth LE / iBeacon proximity apps plus peripheral-style device flows.

- **Early career — learning, freelance & independent delivery** Kyiv, Ukraine

  Freelance & independent

  iOS Developer · Dec 2013 – May 2017

  PROJECT: **Trainee, freelance & indie App Store work**

  Early iOS experience across indie and client-style apps in lean setups (build → submission → iteration), spanning mobility, wellness, commerce, and interactive content.

  - Self-directed learning from 2013; shipped small App Store and client apps across mobility, wellness, commerce, and content—full pipeline to release.
