Maksim Vilchevskiy

Senior/Lead iOS Engineer

Senior/Lead iOS Engineer with 10+ years of product delivery. Strong in Swift, UIKit/SwiftUI, modular architectures (SPM), and shipping end-to-end features with high quality and release safety. Based in Kyiv, open to remote.

📍 Kyiv, Ukraine · Email · LinkedIn · GitHub · Telegram · CV · CV (short version)

About Me

- **10+ years** of experience in **iOS software development**.
- **Extensive experience** with **Swift** and **Objective-C** programming languages.
- Experience in developing mobile applications using **UIKit** and **SwiftUI**.
- Experience in building and maintaining modular architectures using **Swift Package Manager (SPM)**.
- Experience in taking an iOS product from **MVP to App Store**, including architecture, delivery, and release readiness.
- Experience in integration with **REST APIs** and real-time services (**WebSockets**).
- Experience in integrating Apple services and security features (**Apple Pay**, **Keychain**, **Face ID / Touch ID**).
- Experience in developing Apple Watch companion applications (**WatchKit**, **WatchConnectivity**).
- Experience in implementing location, maps, and navigation features (**MapKit**).
- Experience in working with device communication and media features (**Bluetooth**, **AVFoundation**).
- Experience in writing and maintaining **unit tests** and **UI tests**.
- Hard-working, highly motivated to learn new things, and a strong team player.
- **Interests:** exploring applied AI—testing different models and agent workflows on small sandbox projects; experimenting with automation and tooling to speed up delivery.

Skills

Core

Swift, UIKit, SwiftUI, Swift Concurrency (async/await)

Platform & modularization

SPM, modular SDKs, feature boundaries, MVVM-C, MVP (Presenter), DI, Auto Layout, URLSession, REST APIs, XCTest, Keychain, LocalAuthentication, AVFoundation, WatchConnectivity, CoreBluetooth

Product & real-time

WebSockets, Apple Pay, Firebase, Remote Config

Languages

- **English** — B2 (Upper-Intermediate).
- **Ukrainian** — Fluent.
- **Russian** — Native.

Experience

Newest first

GlobalLogic Kyiv, Ukraine

Company website · LinkedIn

Senior iOS Engineer · Jan 2026 – Present

PROJECT: **Apple Watch AI-assistant companion**

Built an Apple Watch companion app for a corporate AI assistant used in field equipment repair scenarios, focused on reliable watch–phone connectivity, audio streaming, and worker safety workflows. Delivered an internal TestFlight build for customer validation.

- Built a bidirectional audio pipeline with watch playback via AVPlayer.
- Rendered structured AI responses for hands-free field workflows.
- Aligned requirements with watchOS constraints (background execution, connectivity, audio sessions).

PASHA HOLDING Baku, Azerbaijan · Kyiv, Ukraine

Company website · LinkedIn

Senior iOS Engineer · Apr 2022 – Jan 2026

PROJECT: **Umico / Birmarket — marketplace & shared SDK ecosystem**

Led Premium Subscription in a marketplace + loyalty ecosystem, delivered as a standalone app and shared SDK integrated into 3 host apps (Birmarket, Birbank, M10) in a multi-squad environment (7–10 iOS engineers).

- Led SPM modularization and built shared marketplace/loyalty SDK modules used across 3 production apps, enabling parallel squad delivery.
- Delivered Premium Subscription end to end (requirements → rollout), integrating cashback/bonus mechanics into loyalty and supporting full localization.
- Improved release safety via staged rollouts and Remote Config-driven experiments, maintaining 99–100% crash-free sessions during controlled exposure.
- Shipped SwiftUI-first product surfaces with UIKit interoperability to keep compatibility with legacy modules.
- Participated in code reviews and alignment on shared SDK APIs, modular boundaries, and integration patterns.

Dodo Engineering Kyiv, Ukraine

Company website · LinkedIn

iOS Engineer (Mid-level+) · Feb 2020 – Feb 2022

PROJECT: **Drinkit — coffee ordering app**

Built ordering and customization for Drinkit, a coffee ordering app for an offline chain. Shipped multiple App Store releases as one of two iOS engineers during early rollout (~8 coffee shops across multiple countries).

- Designed ordering flows that supported deep drink customization and personalization.
- Built an SPM-based modular foundation (Presenter-driven MVP) to keep features isolated and scalable.
- Integrated Apple Pay and loyalty rules into checkout and retention flows.
- Implemented live order tracking via WebSockets with a polling fallback path.

Solvve Kyiv, Ukraine

Company website · LinkedIn

iOS Developer (Mid-level) · Jan 2019 – Feb 2020

PROJECT: **PLAYHERA — esports & gaming tournaments**

Delivered UIKit tournament surfaces and real-time pipelines for PLAYHERA (brackets, scoring, standings, live match updates) in a multi-squad setup with 2–3 iOS engineers per squad.

- Implemented tournament flows for teams and individual players, including creation, brackets, scoring, standings, progress, chat, and leaderboards.
- Delivered live match and bracket updates over WebSockets, handling disconnects, retries, and stale UI state.
- Built dense, multi-step UIKit screens for rosters, scoring, leaderboards, and player profiles using Auto Layout, reusable components, and custom interactions.
- Used Combine for view-model pipelines and event-driven updates across real-time, bracket, and chat flows.
- Improved perceived performance by simplifying state handling and building reusable UI components.

Electus Kyiv, Ukraine

Company profile (DOU)

Lead iOS Engineer · Jul 2018 – Nov 2018

PROJECT: **Electus — crypto market info & wallet MVP**

Primary iOS engineer on an early-stage crypto wallet MVP focused on simplifying transfers for non-crypto users. Shipped the first MVP in a two-person iOS team and mentored a junior engineer.

- Delivered market info and wallet flows, iterating quickly toward release readiness.
- Applied secure storage practices and internal build/TestFlight delivery.
- Shipped the first MVP version; the startup later closed for business reasons.

GBKSoft Kyiv, Ukraine

Company website · LinkedIn

iOS Developer · Jun 2017 – Jun 2018

PROJECT: **Eastern Union — Broker Tool**

Worked in an agency environment across multiple client apps, including Eastern Union (broker tool), The Clovis Culture (online store), and a Bluetooth LE/iBeacon client app. In a cross-functional team of 2–3 iOS engineers, I delivered features across projects, implemented screens and flows, supported releases, and shipped MVPs and updates.

- Built underwriting UI modules for a CRE toolkit, including calculator-style financial flows and “what-if” scenarios.
- Delivered e-commerce screens and flows for an online store app, covering browsing and purchase-oriented UX.
- Shipped a Bluetooth LE/iBeacon client app with proximity-driven UX using Core Bluetooth and Core Location.
- Supported App Store releases and maintenance across projects, including fixes, regression passes, and performance tuning.

Early career — learning, freelance & independent delivery Kyiv, Ukraine

Freelance & independent

iOS Developer · Dec 2013 – May 2017

PROJECT: **Self-study, trainee & junior roles, freelance-style and indie App Store work**

Early iOS career across indie and client-style apps, building fundamentals through shipping. Worked in lean setups from implementation to release and iteration across multiple small products.

- Started with self-directed iOS learning, then moved into trainee/junior roles that transitioned into hands-on delivery.
- Shipped small App Store releases and lean client projects across mobility, wellness, commerce, and interactive content.
- Worked through the full cycle of features: implementation, submission, and post-release iteration based on feedback.

Projects

Umico → Birmarket — Super App / Marketplace App Store

PASHA HOLDING

Swift · SwiftUI · UIKit · Swift Concurrency · SPM · URLSession · Firebase · Remote Config · XCTest

Marketplace super app with loyalty and a shared modular SDK integrated into multiple host apps.

- Modular SPM architecture (core + feature packages) enabling parallel development across squads and apps.
- Shared marketplace/loyalty SDK with stable public APIs, theming, and localization used by multiple host apps.
- SwiftUI-first UI delivery with UIKit interoperability for legacy surfaces and risk management.

- Remote Config for staged rollouts and experiments; XCTest coverage for business-critical modules.

Drinkit — Coffee Ordering App App Store

Dodo Engineering

Swift · UIKit · SPM · URLSession · WebSockets · Apple Pay

Coffee ordering app for an offline chain: customization, loyalty, and real-time order tracking.

- Modular SPM architecture with stable module boundaries to support fast feature delivery.
- Realtime order tracking via WebSockets with a polling fallback path.
- Apple Pay checkout and loyalty rules integrated into ordering flows.

PLAYHERA — Gaming Tournaments App Store

Solvve

Swift · UIKit · Auto Layout · Combine · URLSession · REST · WebSockets

Tournament platform with brackets, scoring, standings, and live match updates.

- Tournament flows for teams and solo players: creation, enrollment, brackets, scoring, standings, and progress tracking.
- Multi-step tournament flows and dense leaderboards/bracket views with UIKit components and custom interactions.
- Reactive view models with Combine pipelines feeding UIKit; coordinated async tournament events, chat, and score streams.
- Live scores and bracket updates over WebSockets with reconnect paths and stale-state handling.

Eastern Union — Broker Tool App Store

GBKSoft

Swift · UIKit · REST · Foundation

Commercial real-estate underwriting toolkit with calculator-style modules for fast deal evaluation.

- Built deal-underwriting UI for a CRE toolkit, including calculator-style financial modules (e.g., cap rates, mortgage payments, IRR and equity waterfall scenarios).
- Integrated data fetching and on-device calculation flows to support fast “what-if” underwriting scenarios on the go.
- Maintained and shipped App Store updates, focusing on UI correctness, stability, and performance for data-heavy screens.

Other projects

AlphaSMS

Objective-C · UIKit · REST · Push Notifications

App Store

Green Riding Hood — Interactive Book

Objective-C · iMessage Extension

App Store

SMS marketing platform—campaign management, broadcast messaging, and client-side tooling.

Read-aloud story with custom animations, gestures, interactive scenes, and an iMessage extension.

News reader

Objective-C · UIKit · Foundation · REST

Ukrainian news aggregator: built a timeline feed from multiple sources with read/unread state and a “read later” list.

Flip Taxi

Objective-C · MapKit · UIKit · REST · Push Notifications

First MVP taxi app for Latvia: request a ride from the phone and track the assigned car on the map in real time.

Alert Meditation

Objective-C · UIKit · AVFoundation · Alamofire · UserNotifications

Meditation micro-app for a New York police department: scheduled reminders for workers after tough shifts, with guided audio sessions and simple program selection.

Tap4Parking

Objective-C · MapKit · UIKit · REST · Alamofire · Push Notifications

Facebook · App Store

Parking-tech startup for Kyiv: real-time parking discovery with payments and private parking administration. Built mobile flows for finding a spot, navigation, and booking, plus integration with payment/processing partners.

Acucharting — 3D acupuncture planner

iPad · SceneKit · Core Graphics · Objective-C

LinkedIn

Doctor’s notebook for acupuncture practice: note-taking for appointments, scheduling with a calendar, and marking needle points as annotations on a 3D human model.

Alchemy — Digital Assets & Precious Metals

Swift · Stripe iOS SDK · Keychain · LocalAuthentication · MVVM · Swinject · SPM · Firebase

MVP for an Australian gold-mining company: mapped physical gold to a blockchain token with buy/sell/exchange flows and an option to pick up gold at any company branch. Delivered KYC/onboarding/wallet and secure storage via Keychain, plus modular multi-environment builds (dev/QA/UAT) with vendor payment/sign-in SDKs and Firebase.
