Summary

Senior iOS engineer with 10+ years of shipping mobile products, from early startup and indie work to large-scale marketplace delivery on a product team. I can build an app from scratch and own critical surfaces in a mature codebase, including turning Premium Subscription into a multi-host SDK used across host apps. My recent path includes marketplace product work, fintech-related client delivery, and Voice AI R&D experiments on watchOS - I want the next Senior iOS role where fintech and AI-adjacent product work keep growing.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency · SPM · Multi-host SDK · Modularization

Experience

○ Senior iOS Engineer · GlobalLogic Jan 2026 – Jun 2026

Apple Watch Voice AI. R&D / demo (not a production App Store release)

- Built the watchOS conversation UI for a voice-first companion for field workers operating hands-free.
- Implemented an iPhone relay for real-time WebSocket and audio under watchOS runtime constraints.
- Implemented structured AI command flows that map assistant responses to on-device app and UI actions.
- Evaluated VelocityAI while delivering iOS/watchOS features.

watchOS · WatchConnectivity · Realtime Audio · AI Command Flows

○ Senior iOS Engineer · PASHA Holding (Birmarket) Apr 2022 – Jan 2026

Birmarket. Marketplace and loyalty

- Took primary iOS ownership of Premium Subscription as a product feature, evolved it beyond a single in-app surface, and later reimplemented it as a configurable multi-host SDK with shared analytics.
- Contributed to modularizing a large iOS codebase and diagnosing memory and UI performance issues in production.
- Delivered marketplace and loyalty flow updates on iOS during the Umico to Birmarket expansion in Azerbaijan.

Multi-host SDK · Modularization · Analytics Infrastructure · Performance & Runtime Diagnostics

○ iOS Engineer · Drinkit Feb 2020 – Feb 2022

Drinkit. Coffee ordering app

- Built the iOS app from scratch with the launch team.
- Implemented and evolved drink customization while helping refine user flows and scenarios.
- Helped design and integrate contextual offers, including offer mechanics and client-backend data flow; backend services determine the final offer.

UIKit · Product Customization · Contextual Offers

Earlier iOS experience

Earlier commercial iOS work included a mobile client for a gold-backed digital asset product linked to physical gold (buy/sell, price chart, Stripe), an esports competition platform (PLAYHERA, team management, RxSwift), and foundational product/client delivery from 2013.
