Summary

Senior iOS Engineer with 10+ years building production mobile applications across marketplaces, loyalty, subscriptions, and real-time products. Recently delivered an Apple Watch voice AI prototype with real-time backend communication, intent-driven navigation, and hands-free workflows (R&D, NDA). Built and maintained a shared marketplace/loyalty SDK across 3 production host applications, enabling parallel delivery for 7–10 iOS engineers; owned Premium Subscription end-to-end with 99–100% crash-free staged releases.

About Me

- **UIKit/SwiftUI**, modular **SPM**, shared SDKs, networking, and Apple platform services (Apple Pay, Keychain, WatchConnectivity).
- Unit test coverage for critical business modules (XCTest).
- Release work: TestFlight, step-by-step rollouts, multi-env builds (dev/QA/UAT).

Expertise

Product delivery App Store releases, TestFlight, step-by-step rollouts, feature ownership.	Architecture Architecture ownership: SPM modules, shared SDKs, stable APIs across apps.
Platform UIKit/SwiftUI, Watch, Apple Pay, WebSockets, security.	Quality & release Code review, unit test coverage for critical business logic, multi-env builds, Remote Config.

Skills

Core	Architecture	Platform	Release & quality
Swift, UIKit, SwiftUI, Swift Concurrency (async/await)	SPM, modular SDKs, MVVM-C, DI, feature modules	URLSession, REST, WebSockets, Apple Pay, Keychain, WatchConnectivity, Firebase, Remote Config	TestFlight, multi-env builds (dev/QA/UAT), XCTest, code review

Languages

- **English** — B1 (Intermediate).
- **Ukrainian** — Fluent.
- **Russian** — Native.

Senior iOS Engineer · Jan 2026 – Jun 2026

PROJECT: watchOS AI voice assistant — R&D client project (NDA)

R&D client project (NDA). Voice-driven AI on Apple Watch with live backend, on-device intent parsing, and hands-free prototype flows.

- Prototyped a voice-driven AI assistant on Apple Watch with a live backend over WebSockets and WatchConnectivity.
- Built an on-device intent parser so AI commands update screens, navigation, and forms in real time.
- Connected server-side intents to watchOS flows so users could complete tasks hands-free.
- Shipped internal TestFlight builds; designed flows within watchOS constraints (connectivity, background execution, audio sessions).

Senior iOS Engineer · Apr 2022 – Jan 2026

PROJECT: Umico / Birmarket — marketplace & loyalty super app and shared iOS SDK ecosystem

Led iOS delivery for marketplace and loyalty in 3 host apps (Birmarket, Birbank, M10). Worked with Kapital Bank subdivision teams on SDK integration. Product scope: marketplace and loyalty modules, not core banking.

- Built a shared marketplace/loyalty SDK used in 3 production apps, enabling parallel work for 7–10 iOS engineers across squads.
- Owned Premium Subscription end-to-end — requirements, implementation, localization, and App Store release (cashback/bonus logic).
- Maintained 99–100% crash-free sessions during step-by-step releases and Firebase Remote Config experiments.
- Delivered new product screens in SwiftUI while keeping legacy UIKit modules stable.
- Aligned shared SDK APIs and module boundaries through code reviews across squads.

Senior iOS Engineer · Feb 2020 – Feb 2022

PROJECT: **Drinkit — coffee ordering app for an offline coffee chain**

Drinkit — coffee ordering app for an offline coffee chain. One of two iOS engineers during early App Store rollout (~8 coffee shops).

- Built ordering and drink customization flows and shipped App Store releases as one of two iOS engineers (~8 coffee shops in several countries).
- Split the app into SPM modules with MVP (Presenter) for new features and cleaner ownership.
- Integrated Apple Pay and loyalty into checkout and implemented live order tracking over WebSockets with a polling fallback.

iOS Developer · Jan 2019 – Feb 2020

PROJECT: **PLAYHERA — esports & gaming tournaments**

Built tournament screens for PLAYHERA (brackets, scores, live updates). Team of 2–3 iOS devs per squad.

- Built tournament flows for teams and solo players: brackets, scores, chat, leaderboards.
- Live match and bracket updates over WebSockets. Handled disconnects and retries.
- Built UIKit screens for rosters, scores, leaderboards, and player profiles.
- Used Combine for view models and live updates in tournament and chat flows.

Electus Kyiv, Ukraine

iOS Developer · Jul 2018 – Nov 2018

PROJECT: **Electus — crypto market info & wallet MVP**

Main iOS engineer on an early crypto wallet MVP for users new to crypto. Led architecture and first release in a team of two. Mentored a junior engineer.

- Built an MVP with market info and wallet flows. Shipped the first version.
- Used secure storage and TestFlight for internal builds.

iOS Developer · Jun 2017 – Jun 2018

PROJECT: Eastern Union — Broker Tool

Agency work on several client apps: Eastern Union (broker tool), Clovis Culture (online store), and a Bluetooth/iBeacon app. Team of 2–3 iOS engineers.

- Built underwriting UI with calculator-style flows for a broker tool.
- Built shop screens and purchase flows for an online store app.
- Shipped a Bluetooth/iBeacon app with location-based UX.
- Supported App Store releases: fixes, testing, and performance work.

Early career — learning, freelance & independent delivery Kyiv, Ukraine

Freelance & independent

iOS Developer · Dec 2013 – May 2017

PROJECT: Self-study, trainee & junior roles, freelance-style and indie App Store work

Early iOS career: indie apps and small client projects. Built, submitted, and updated apps in different areas.

- Self-study from 2013, then trainee and junior roles with hands-on work.
- Shipped small App Store and client apps in mobility, wellness, commerce, and games.
- Full cycle: build features, submit to App Store, update after user feedback.
