

Max Vilchevskiy

Kyiv, Ukraine

Senior iOS Engineer

Consumer apps · Marketplaces · Loyalty SDKs

vil4max@gmail.com · linkedin.com/in/vil4max · github.com/vil4max · vil4max.github.io · [@vil4max](https://twitter.com/vil4max)

Professional Summary

Senior iOS product engineer focused on consumer-facing applications, shared loyalty platforms, and cross-application SDK integration. Owned Premium Subscription and a shared Premium Subscription SDK at Birmarket (PASHA), designed and implemented a unified analytics API in the loyalty SDK, and contributed to marketplace commerce at scale. Shipped Drinkit from MVP to the App Store as part of a small iOS product team. Recent work includes watchOS voice AI R&D and realtime client flows on Apple platforms; commercial RxSwift experience at PLAYHERA. 12+ years shipping from indie apps to national-scale marketplaces.

Skills

Languages & platforms: Swift · Objective-C · SwiftUI · UIKit · watchOS · SPM · Foundation · Auto Layout

Concurrency & reactive: Swift Concurrency · async/await · Combine · RxSwift

Networking & data: URLSession · URLSessionWebSocketTask · Alamofire · WebSockets · Network · REST · Core Data · SwiftData · Keychain · LocalAuthentication

Analytics: analytics SDK architecture · multi-provider event routing

Media & device: AVFoundation · AVAudioEngine · AVKit · SceneKit · CoreLocation · MapKit · Core Bluetooth

Apple frameworks: WatchKit · WatchConnectivity · UserNotifications · PassKit · Apple Pay · XCTest · TestFlight

Payments & commerce: Apple Pay · PassKit · Stripe

Third-party libraries: SPM · CocoaPods · Alamofire · RxSwift · DI · Stripe iOS SDK · Firebase · Google Maps SDK · web3 SDK

English — Intermediate (comfortable with technical calls)

Work Experience

GlobalLogic · Senior iOS Engineer · Jan 2026 – Jun 2026

Kyiv, Ukraine · Remote

PROJECT: Apple Watch Voice AI — R&D project

- Built watchOS voice conversation flows and iPhone relay for realtime WebSocket/audio communication.
- Integrated watchOS/iPhone communication and audio handling under watchOS runtime and TestFlight constraints.
- Worked on command-driven watchOS flows where an AI assistant returned structured client commands that were interpreted and executed by the application.
- Contributed iOS engineering feedback while beta-testing VelocityAI through a sample product cycle from idea to release.

Swift · WatchKit · WatchConnectivity · SwiftUI · URLSessionWebSocketTask · AVFoundation · AVAudioEngine · Swift Concurrency · async/await · VelocityAI

PASHA Holding · Senior iOS Engineer · Apr 2022 – Jan 2026

Kyiv, Ukraine · Remote

PROJECT: Birmarket — online marketplace & loyalty · Loyalty squad

- Owned Premium Subscription and shared Premium Subscription SDK with per-host configuration across multiple host apps.
- Designed and implemented a unified analytics API in the loyalty SDK, routing events to six providers including Firebase, AppsFlyer, Amplitude, Mixpanel, PostHog, and Sentry.
- Contributed to consumer marketplace flows across catalog, loyalty, and ordering in a product with 500,000+ SKUs and 900+ pickup points.

Swift · SwiftUI · UIKit · SPM · URLSession · Firebase Analytics · Firebase Crashlytics · Amplitude · Mixpanel · AppsFlyer · PostHog · Sentry · Keychain · Swift Concurrency · async/await · Combine

Dodo Brands · iOS Engineer · Feb 2020 – Feb 2022

Kyiv, Ukraine · Remote

PROJECT: Drinkit — coffee ordering app

- Delivered Drinkit from MVP to App Store on a small iOS product team; brand now has 215+ shops in 5 countries.
- Consumer ordering — pre-order, customization, Apple Pay with loyalty, and live order tracking over WebSockets with polling fallback.

Swift · UIKit · SPM · URLSession · Apple Pay · PassKit · AVFoundation · AVKit

SOLVE · iOS Developer · Jan 2019 – Feb 2020

Remote

PROJECT: PLAYHERA — esports & gaming tournaments

- Built team creation and management flows for competitive gaming squads in a production App Store app.

Swift · UIKit · RxSwift · REST · Auto Layout

Electus · iOS Developer · Jul 2018 – Nov 2018

Kyiv, Ukraine

PROJECT: Electus — blockchain assistant startup

- iOS engineer on a startup blockchain assistant — market tracking, owned assets, and transfer flows; paired with a junior engineer on implementation.

Swift · UIKit · web3 SDK · Keychain · TestFlight

GBKSoft · iOS Developer · Jun 2017 – Jun 2018

Kyiv, Ukraine

PROJECT: Eastern Union — commercial real estate (CRE) app

PROJECTS

- **Eastern Union — CRE app** — Free CRE toolbox — eCALC underwriting, live rates, comps/maps (App Store)
- iOS development for Eastern Union — a free commercial real estate (CRE) app for US brokers and investors (Eastern Union Funding). Implemented eCALC underwriting features: cap rates, IRR, cash-

on-cash, blended mortgage payments, and equity waterfall calculations.

Swift · UIKit · REST · Core Bluetooth · Core Location

Amcon Soft · iOS Developer · Nov 2015 – Jun 2017

Remote

PROJECT: **Client iOS projects**

PROJECTS

- **Acucharting** — iPad app — 3D body model with SceneKit nodes; doctor notes stored in Core Data
- Owned iOS delivery on several client apps in a remote team (PM/QA/backend) — shipped App Store releases and follow-up iterations.

Objective-C · UIKit · SceneKit · Core Data · AVFoundation · REST · APNs

Tap4Parking · iOS Developer · Nov 2014 – Nov 2015

Remote

PROJECT: **Tap4Parking — parking startup product**

PROJECTS

- **Tap4Parking** — Parking app for Kyiv — MapKit + Google Maps SDK; CoreLocation (background/geofencing)
- Built search, booking, navigation, and payment flows for a parking startup — shipped App Store releases.

Objective-C · UIKit · MapKit · Google Maps SDK · CoreLocation · REST · Alamofire · Push Notifications

iCenter · Junior iOS Developer · Dec 2013 – Nov 2014

Kyiv, Ukraine · On-site

PROJECT: **Product apps — messaging and content**

- Built SMS campaign and in-app messaging flows — integrated REST APIs and shipped to production.

Objective-C · UIKit · REST · APNs
