About Me

- **UIKit/SwiftUI**, modular **SPM**, networking, and Apple platform services (Apple Pay, Keychain, WatchConnectivity).
- Release-safe delivery — staged rollouts, Remote Config, XCTest for business-critical modules.

Expertise

Product delivery

MVP → App Store, staged rollouts, TestFlight, crash-free release exposure.

Architecture

SPM modularization, shared SDKs, stable public APIs, multi-app ecosystems.

Platform

UIKit/SwiftUI, Watch, Apple Pay, real-time networking, security features.

Quality

XCTest, code review, Swift Concurrency, release-safe integration patterns.

Skills

Core

Swift, UIKit, SwiftUI, Swift Concurrency (async/await)

Product & real-time

WebSockets, Apple Pay, Firebase, Remote Config

Platform & modularization

SPM, modular SDKs, feature boundaries, MVVM-C, MVP (Presenter), DI, Auto Layout, URLSession, REST APIs, XCTest, Keychain, LocalAuthentication, AVFoundation, WatchConnectivity, CoreBluetooth

Languages

- **English** — B2 (Upper-Intermediate).
- **Ukrainian** — Fluent.
- **Russian** — Native.

Senior iOS Engineer · Feb 2026 – Jun 2026

PROJECT: **watchOS AI voice assistant — client project (NDA)**

Client project (NDA). Built a watchOS app with a voice-controlled AI assistant connected to backend over WebSocket; on-device parsing of agent responses drove UI state, navigation, and form filling for hands-free workflows.

- Built watchOS app with voice input and real-time AI responses streamed from backend via WebSocket.
- Designed on-device parser for structured agent commands that drive UI state, screen navigation, and form filling.
- Implemented agent-to-app action layer: server-side intents mapped to watch flows and business logic without manual taps.
- Optimized for hands-free, glanceable interactions under watchOS lifecycle and connectivity constraints.

PROJECT: Umico / Birmarket — marketplace & loyalty super app and shared iOS SDK ecosystem

Led iOS delivery for marketplace and loyalty products integrated into multiple host applications (Birmarket, Birbank, M10). Work included coordination with Kapital Bank subdivision teams for SDK host-app integration; product scope was marketplace and loyalty modules, not core banking features.

- Led SPM modularization and built shared marketplace/loyalty SDK modules used across 3 production apps, enabling parallel squad delivery in a multi-squad environment (7–10 iOS engineers).
- Delivered Premium Subscription end to end (requirements → rollout), including cashback/bonus mechanics and full localization.
- Improved release safety via staged rollouts and Firebase Remote Config experiments, maintaining 99–100% crash-free sessions during controlled exposure.
- Shipped SwiftUI-first product surfaces with UIKit interoperability for legacy modules.
- Aligned shared SDK APIs, modular boundaries, and integration patterns through code reviews across squads.

PROJECT: Drinkit — coffee ordering app for an offline coffee chain

Drinkit — coffee ordering app for an offline coffee chain.

- Built ordering and drink customization flows; shipped multiple App Store releases as one of two iOS engineers during early rollout (~8 coffee shops across multiple countries).
- Designed an SPM-based modular foundation (Presenter-driven MVP) for isolated, scalable features.
- Integrated Apple Pay and loyalty rules into checkout and retention flows.
- Implemented live order tracking via WebSockets with a polling fallback path.

PROJECT: **PLAYHERA — esports & gaming tournaments**

Delivered UIKit tournament surfaces and real-time pipelines for PLAYHERA (brackets, scoring, standings, live match updates) in a multi-squad setup with 2–3 iOS engineers per squad.

- Implemented tournament flows for teams and individual players, including creation, brackets, scoring, standings, progress, chat, and leaderboards.
- Delivered live match and bracket updates over WebSockets, handling disconnects, retries, and stale UI state.
- Built dense, multi-step UIKit screens for rosters, scoring, leaderboards, and player profiles using Auto Layout, reusable components, and custom interactions.
- Used Combine for view-model pipelines and event-driven updates across real-time, bracket, and chat flows.

Electus Kyiv, Ukraine

iOS Developer · Jul 2018 – Nov 2018

PROJECT: **Electus — crypto market info & wallet MVP**

Worked on an early-stage crypto wallet MVP designed to simplify receiving and transferring cryptocurrency for non-crypto users. As the primary iOS engineer in a two-person team, I led architecture and MVP delivery, mentored a junior engineer, and owned key product flows, secure storage decisions, and release readiness.

- Led architecture and delivery of an MVP combining market information with wallet-oriented flows; shipped the first MVP version.
- Applied secure storage practices and internal build/TestFlight delivery.

GBKSoft Kyiv, Ukraine

iOS Developer · Jun 2017 – Jun 2018

PROJECT: Eastern Union — Broker Tool

Worked in an agency environment across multiple client apps, including Eastern Union (broker tool), The Clovis Culture (online store), and a Bluetooth LE/iBeacon client app. In a cross-functional team of 2–3 iOS engineers, I delivered features across projects, implemented screens and flows, supported releases, and shipped MVPs and updates.

- Built underwriting UI modules for a CRE toolkit, including calculator-style financial flows and “what-if” scenarios.
- Delivered e-commerce screens and flows for an online store app, covering browsing and purchase-oriented UX.
- Shipped a Bluetooth LE/iBeacon client app with proximity-driven UX using Core Bluetooth and Core Location.
- Supported App Store releases and maintenance across projects, including fixes, regression passes, and performance tuning.

Early career — learning, freelance & independent delivery Kyiv, Ukraine

Freelance & independent

iOS Developer · Dec 2013 – May 2017

PROJECT: Self-study, trainee & junior roles, freelance-style and indie App Store work

Early iOS career across indie and client-style apps, building fundamentals through shipping. Worked in lean setups from implementation to release and iteration across multiple small products.

- Started with self-directed iOS learning, then moved into trainee/junior roles that transitioned into hands-on delivery.
- Shipped small App Store releases and lean client projects across mobility, wellness, commerce, and interactive content.
- Worked through the full cycle of features: implementation, submission, and post-release iteration based on feedback.

Projects

Umico → Birmarket — Super App / Marketplace [App Store](#)

PASHA Holding

Swift · SwiftUI · UIKit · Swift Concurrency · SPM · URLSession · Firebase · Remote Config · XCTest

Marketplace super app with loyalty and a shared modular SDK integrated into multiple host apps.

- Modular SPM architecture (core + feature packages) enabling parallel development across squads and apps.
- Shared marketplace/loyalty SDK with stable public APIs, theming, and localization used by multiple host apps.
- SwiftUI-first UI delivery with UIKit interoperability for legacy surfaces and risk management.

- Remote Config for staged rollouts and experiments; XCTest coverage for business-critical modules.

Drinkit — Coffee Ordering App [App Store](#)

Dodo Brands

Swift · UIKit · SPM · URLSession · WebSockets · Apple Pay

Coffee ordering app for an offline chain: customization, loyalty, and real-time order tracking.

- Modular SPM architecture with stable module boundaries to support fast feature delivery.
- Realtime order tracking via WebSockets with a polling fallback path.
- Apple Pay checkout and loyalty rules integrated into ordering flows.

PLAYHERA — Gaming Tournaments [App Store](#)

Solve

Swift · UIKit · Auto Layout · Combine · URLSession · REST · WebSockets

Tournament platform with brackets, scoring, standings, and live match updates.

- Tournament flows for teams and solo players: creation, enrollment, brackets, scoring, standings, and progress tracking.
- Multi-step tournament flows and dense leaderboards/bracket views with UIKit components and custom interactions.
- Reactive view models with Combine pipelines feeding UIKit; coordinated async tournament events, chat, and score streams.
- Live scores and bracket updates over WebSockets with reconnect paths and stale-state handling.

Eastern Union — Broker Tool [App Store](#)

GBKSoft

Swift · UIKit · REST · Foundation

Commercial real-estate underwriting toolkit with calculator-style modules for fast deal evaluation.

- Built deal-underwriting UI for a CRE toolkit, including calculator-style financial modules (e.g., cap rates, mortgage payments, IRR and equity waterfall scenarios).
- Integrated data fetching and on-device calculation flows to support fast “what-if” underwriting scenarios on the go.
- Maintained and shipped App Store updates, focusing on UI correctness, stability, and performance for data-heavy screens.

| Other projects

AlphaSMS

Objective-C · UIKit · REST · Push Notifications

[App Store](#)

Green Riding Hood — Interactive Book

Objective-C · iMessage Extension

[App Store](#)

SMS marketing platform—campaign management, broadcast messaging, and client-side tooling.

Read-aloud story with custom animations, gestures, interactive scenes, and an iMessage extension.

News reader

Objective-C · UIKit · Foundation · REST

Ukrainian news aggregator: built a timeline feed from multiple sources with read/unread state and a “read later” list.

Flip Taxi

Objective-C · MapKit · UIKit · REST · Push Notifications

First MVP taxi app for Latvia: request a ride from the phone and track the assigned car on the map in real time.

Alert Meditation

Objective-C · UIKit · AVFoundation · Alamofire · UserNotifications

Meditation micro-app for a New York police department: scheduled reminders for workers after tough shifts, with guided audio sessions and simple program selection.

Tap4Parking

Objective-C · MapKit · UIKit · REST · Alamofire · Push Notifications

[Facebook](#) · [App Store](#)

Parking-tech startup for Kyiv: real-time parking discovery with payments and private parking administration. Built mobile flows for finding a spot, navigation, and booking, plus integration with payment/processing partners.

Acucharting — 3D acupuncture planner

iPad · SceneKit · Core Graphics · Objective-C

[LinkedIn](#)

Doctor’s notebook for acupuncture practice: note-taking for appointments, scheduling with a calendar, and marking needle points as annotations on a 3D human model.

Alchemy — Digital Assets & Precious Metals

Swift · Stripe iOS SDK · Keychain · LocalAuthentication · MVVM · Swinject · SPM · Firebase

MVP for an Australian gold-mining company: mapped physical gold to a blockchain token with buy/sell/exchange flows and an option to pick up gold at any company branch. Delivered KYC/onboarding/wallet and secure storage via Keychain, plus modular multi-environment builds (dev/QA/UAT) with vendor payment/sign-in SDKs and Firebase.
