PROJECT: watchOS AI voice assistant — client project (NDA)
Client project (NDA). Voice-controlled AI assistant on Apple Watch with WebSocket backend; parsed agent responses drive UI, navigation, and forms.
 - Voice AI assistant on watchOS with real-time backend over WebSocket.
 - On-device parser maps agent commands to UI state, navigation, and form filling.
 - Hands-free workflows optimized for glanceable watch interactions.

Senior iOS Engineer · 2022 – 2026

PROJECT: **Umico / Birmarket — marketplace & loyalty super app**

Marketplace and loyalty products in 3 host apps (Birmarket, Birbank, M10). SDK host-app integration with Kapital Bank subdivision; scope was marketplace and loyalty, not core banking.

- Led SPM modularization and built a shared marketplace/loyalty SDK with multi-brand theming and stable public APIs, integrated into Birmarket, Birbank, and M10.
- Led Premium Subscription end to end, from requirements to rollout, including localization; contributed via code reviews across squads.
- Improved release safety via staged rollouts and Remote Config-driven experiments, maintaining 99–100% crash-free sessions during controlled exposure.

Senior iOS Engineer · 2020 – 2022

PROJECT: **Drinkit — coffee ordering app**

Drinkit — coffee ordering app for an offline coffee chain. One of two iOS engineers during early App Store rollout.

- Delivered core ordering flows; designed an SPM-based modular SDK with a Presenter-driven MVP architecture.
- Integrated Apple Pay and loyalty rules; implemented live order tracking with WebSockets + fallback polling.

iOS Developer · 2019 – 2020

PROJECT: **PLAYHERA — esports & gaming tournaments**

Delivered UIKit tournament surfaces and real-time pipelines for PLAYHERA (brackets, scoring, standings, live match updates) in a multi-squad setup with 2–3 iOS engineers per squad.

- Implemented tournament flows (brackets, scoring, standings, chat, leaderboards) and dense UIKit screens for rosters and player profiles.
- Delivered realtime updates over WebSockets + Combine, handling disconnects, retries, and stale UI state.

iOS Developer · 2017 – 2018

PROJECT: Eastern Union, Clovis Culture, iBeacon client app

Agency delivery across commercial tooling, e-commerce, and BLE/iBeacon client apps in a cross-functional team of 2–3 iOS engineers.

- Trading and commerce apps with live data; Bluetooth LE / iBeacon proximity experiences; App Store releases.
- **Early career — learning, freelance & independent delivery** Kyiv, Ukraine

Freelance & independent

iOS Developer · 2013 – 2017

PROJECT: Trainee, freelance & indie App Store work

Early iOS experience across indie and client-style apps in lean setups (build → submission → iteration), spanning mobility, wellness, commerce, and interactive content.

- Self-directed learning from 2013; shipped small App Store and client apps—full pipeline to release.
