

Max Vilchevskiy

Senior iOS Engineer

Kyiv, Ukraine · Remote · vil4max@gmail.com · vil4max.github.io · linkedin.com/in/vil4max · github.com/vil4max

Summary

Senior iOS product engineer with 10+ years of experience building and shipping mobile products from early-stage ideas and MVPs to production applications at scale. Worked across consumer apps, marketplaces, loyalty products, and commercial iOS projects, owning features and iOS delivery through App Store release and continued product development. Recent work extends this product engineering background into shared mobile infrastructure and watchOS voice AI R&D.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency · watchOS · Objective-C

English: Upper-Intermediate (B2)

Experience

Senior iOS Engineer · GlobalLogic · Jan 2026 – Jun 2026

Apple Watch Voice AI — voice-first companion R&D for field workers

- Built the watchOS conversation experience for a voice-first companion designed for hands-occupied field scenarios.
- Implemented an iPhone relay for realtime WebSocket and audio communication, keeping the conversation UI on Apple Watch under watchOS runtime constraints.
- Worked on structured AI command flows where assistant responses were interpreted on-device and mapped to application and UI actions.
- Evaluated VelocityAI through hands-on iOS delivery scenarios, reviewing specification and design context through implementation workflows.

watchOS · WatchConnectivity · Realtime Audio · AI Command Flows

Senior iOS Engineer · PASHA Holding (Birmarket) · Apr 2022 – Jan 2026

Birmarket — consumer marketplace & loyalty

- Worked as Senior iOS Engineer on a large production marketplace and loyalty product, with Premium Subscription becoming my primary iOS responsibility.
- Grew Premium Subscription from an in-app feature into a broader product surface, then extracted and reimplemented it as a shared multi-host SDK for Birmarket, Birbank, and M10.
- Designed the SDK integration boundary with per-host configuration and a shared analytics API, keeping feature modules independent from host analytics setup.
- Delivered product work across marketplace and loyalty areas while contributing to the evolution and modularization of a large production iOS codebase.

Multi-host SDK · Modularization · Analytics Infrastructure · Performance & Runtime Diagnostics

iOS Engineer · Drinkit · Feb 2020 – Feb 2022

Drinkit — consumer coffee ordering for physical coffee shops

- Built the production iOS product from scratch as part of the team launching a new consumer business, working from early product ideas and real commercial constraints.
- Implemented and evolved drink customization while contributing to user-scenario exploration and refinement of customer-facing product flows.
- Participated in designing and integrating contextual offers, contributing to offer mechanics and client/backend data-flow decisions.

Product Customization · Contextual Offers

iOS Developer · SOLVE · Jan 2019 – Feb 2020

PLAYHERA — esports & gaming tournaments

- Built team creation and management flows for a production esports application.
- Worked commercially with RxSwift in an existing UIKit codebase, implementing and maintaining reactive feature flows.

RxSwift

Earlier iOS experience

2013–2018: Product and client iOS development across multiple domains.
