Swift · Objective-C · SwiftUI · UIKit · watchOS · SPM · Swift Concurrency · async/await · Combine · RxSwift · URLSession · URLSessionWebSocketTask · Alamofire · REST · Core Data · SwiftData · Keychain · analytics SDK abstraction · AVFoundation · AVAudioEngine · WatchKit · WatchConnectivity · App Intents · PassKit · Apple Pay · Firebase Analytics · XCTest · TestFlight · Stripe · MVVM · DI · AI coding agents

English — Intermediate

Summary

Senior iOS Engineer with 12+ years building consumer, fintech, and marketplace applications. Recent work includes a watchOS voice AI R&D client, a shared Premium Subscription SDK used across multiple host apps, and an analytics abstraction layer routing events to Amplitude, Mixpanel, AppsFlyer, Firebase, PostHog, and Sentry. Use AI coding agents daily for implementation, testing, code review, and large-scale refactoring.

Experience

GlobalLogic · Senior iOS Engineer · Jan 2026 – Jun 2026

Kyiv, Ukraine · Remote

PROJECT: Apple Watch Voice AI — R&D project

Senior iOS engineer on watchOS client — architecture, Watch ↔ iPhone connectivity, TestFlight delivery. Beta tester for VelocityAI — hands-on evaluation of GenAI-assisted SDLC tooling in a client-delivery context.

- Built a watchOS voice AI client with fully on-device conversational flows.
- iPhone acts as a backend relay (WebSocket not available on Watch): built the Watch ↔ iPhone channel for audio and shared state with the server-side AI agent, including deduplication across devices (URLSessionWebSocketTask).
- Split features between Watch and iPhone where platform limits required it; shipped internal TestFlight builds within watchOS constraints (background, audio sessions, connectivity).
- Built on-device intent handling so that commands update navigation and forms without needless round trips.
- Beta-tested VelocityAI — hands-on evaluation of GlobalLogic's enterprise GenAI / AI-powered SDLC platform (agent workflows, governed AI in software delivery); feedback from an iOS engineer's shipping perspective.

Swift · WatchKit · WatchConnectivity · SwiftUI · URLSessionWebSocketTask · AVFoundation · AVAudioEngine · App Intents · Swift Concurrency · async/await · VelocityAI

PASHA Holding · Senior iOS Engineer · Apr 2022 – Jan 2026

Kyiv, Ukraine · Remote

PROJECT: Birmarket — online marketplace & loyalty · Loyalty squad

Senior iOS engineer on marketplace commerce and Loyalty squad — owned Premium Subscription module, Premium Subscription SDK extraction, and Analytics module on Birmarket; shared loyalty platform with per-host configuration in Birbank and M10.

- Shipped core marketplace commerce in a production online store — catalog, search, cart, checkout, and orders — across App Store releases.
- Owned the Premium Subscription module — subscription flows and UI; checkout delegated to shared purchase model, handling subscription status responses on the feature side.
- Built Analytics module for Birmarket — unified analytics API; routed events to multiple analytics SDKs (Firebase Analytics/Crashlytics, Amplitude, Mixpanel, AppsFlyer, PostHog, Sentry) without feature code depending on connected SDKs.
- Migrated Premium Subscription module into Premium Subscription SDK with per-host-app configuration inside the shared loyalty platform.

Swift · SwiftUI · UIKit · SPM · URLSession · Firebase Analytics · Firebase Crashlytics · Amplitude · Mixpanel · AppsFlyer · PostHog · Sentry · Keychain · Swift Concurrency · async/await · Combine

Dodo Brands · iOS Engineer · Feb 2020 – Feb 2022

Kyiv, Ukraine · Remote

PROJECT: Drinkit — coffee ordering app

iOS engineer on a three-person team — pre-order and customization flows, menu video, Apple Pay + loyalty, pickup tracking, and production releases.

- Built Drinkit from MVP through major App Store release on a three-person team — pre-order and drink customization.
- Built pre-order and drink customization flows for Drinkit's app-led coffee ritual.
- Shipped Reels-style drink video for menu discovery; Apple Pay checkout with loyalty; live order tracking for slot pickup.

Swift · UIKit · SPM · URLSession · Apple Pay · PassKit · AVFoundation · AVKit

Junior iOS in product companies and indie App Store apps. Full experience at vil4max.github.io — newest first.
