

Max Vilchevskiy

Senior iOS Engineer

Kyiv, Ukraine · Remote · vil4max@gmail.com · vil4max.github.io · linkedin.com/in/vil4max · github.com/vil4max

Summary

Senior iOS engineer with 10+ years building complex mobile products. Experience spans the full product lifecycle—from customer-facing experiences to shared infrastructure. Took primary iOS responsibility for Premium Subscription at PASHA Holding and later reimplemented it as a configurable multi-host SDK with shared analytics; built the Drinkit iOS app from scratch with the launch team; built the watchOS conversation UI for a Voice AI R&D project at GlobalLogic.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency · watchOS · Objective-C

English: Upper-Intermediate (B2)

Experience

Senior iOS Engineer · GlobalLogic · Jan 2026 – Jun 2026

Apple Watch Voice AI — R&D project

- Built the watchOS conversation UI for a voice-first companion for field workers operating hands-free.
- Implemented an iPhone relay for real-time WebSocket and audio under watchOS runtime constraints.
- Implemented structured AI command flows that map assistant responses to on-device app and UI actions.
- Evaluated VelocityAI while building iOS features for the project.

watchOS · WatchConnectivity · Realtime Audio · AI Command Flows

Senior iOS Engineer · PASHA Holding (Birmarket) · Apr 2022 – Jan 2026

Birmarket — marketplace & loyalty

- Took primary iOS responsibility for Premium Subscription, evolved it beyond a single in-app feature, and later reimplemented it as a configurable multi-host SDK with shared analytics.
- Contributed to modularizing a large iOS codebase and diagnosing memory and UI performance issues in production.
- Delivered marketplace and loyalty flow updates on iOS during the Umico → Birmarket expansion in Azerbaijan.

Multi-host SDK · Modularization · Analytics Infrastructure · Performance & Runtime Diagnostics

iOS Engineer · Drinkit · Feb 2020 – Feb 2022

Drinkit — coffee ordering app

- Built the iOS app from scratch with the launch team.
- Implemented and evolved drink customization while helping refine user flows and scenarios.
- Helped design and integrate contextual offers, including offer mechanics and client-backend data flow; backend services determine the final offer.

Product Customization · Contextual Offers

Earlier iOS experience

2013–early 2020: Product and client iOS development across multiple domains.
