Summary

Senior iOS Engineer with 10+ years building production mobile applications across marketplaces, loyalty, subscriptions, and real-time products. Recently delivered an Apple Watch voice AI prototype with real-time backend communication, intent-driven navigation, and hands-free workflows (R&D, NDA). Built and maintained a shared marketplace/loyalty SDK across 3 production host applications, enabling parallel delivery for 7–10 iOS engineers; owned Premium Subscription end-to-end with 99–100% crash-free staged releases.

About Me

- **UIKit/SwiftUI**, modular **SPM**, shared SDKs, networking, and Apple platform services (Apple Pay, Keychain, WatchConnectivity).
- Unit test coverage for critical business modules (XCTest).
- Release work: TestFlight, step-by-step rollouts, multi-env builds (dev/QA/UAT).

Expertise

Product delivery

App Store releases, TestFlight, step-by-step rollouts, feature ownership.

Architecture

Architecture ownership: SPM modules, shared SDKs, stable APIs across apps.

Platform

UIKit/SwiftUI, Watch, Apple Pay, WebSockets, security.

Quality & release

Code review, unit test coverage for critical business logic, multi-env builds, Remote Config.

Skills

Core

Swift, UIKit, SwiftUI, Swift Concurrency
(async/await)

Platform

URLSession, REST, WebSockets, Apple Pay,
Keychain, WatchConnectivity, Firebase, Remote
Config

Architecture

SPM, modular SDKs, MVVM-C, DI, feature modules

Release & quality

TestFlight, multi-env builds (dev/QA/UAT), XCTest,
code review

Languages

- **English** — B1 (Intermediate).
- **Ukrainian** — Fluent.
- **Russian** — Native.

Education

Donetsk State University of Management · Donetsk, Ukraine
Bachelor's degree, Production sector management

Experience

Senior iOS Engineer · Jan 2026 – Jun 2026

PROJECT: watchOS AI voice assistant — R&D client project (NDA)

R&D client project (NDA). Voice-driven AI on Apple Watch with live backend, on-device intent parsing, and hands-free prototype flows.

- Prototyped a voice-driven AI assistant on Apple Watch with a live backend over WebSockets and WatchConnectivity.
- Built an on-device intent parser so AI commands update screens, navigation, and forms in real time.
- Connected server-side intents to watchOS flows so users could complete tasks hands-free.
- Shipped internal TestFlight builds; designed flows within watchOS constraints (connectivity, background execution, audio sessions).

PROJECT: Umico / Birmarket — marketplace & loyalty super app and shared iOS SDK ecosystem

Led iOS delivery for marketplace and loyalty in 3 host apps (Birmarket, Birbank, M10). Worked with Kapital Bank subdivision teams on SDK integration. Product scope: marketplace and loyalty modules, not core banking.

- Built a shared marketplace/loyalty SDK used in 3 production apps, enabling parallel work for 7–10 iOS engineers across squads.
- Owned Premium Subscription end-to-end — requirements, implementation, localization, and App Store release (cashback/bonus logic).
- Maintained 99–100% crash-free sessions during step-by-step releases and Firebase Remote Config experiments.
- Delivered new product screens in SwiftUI while keeping legacy UIKit modules stable.
- Aligned shared SDK APIs and module boundaries through code reviews across squads.

Alchemy (outsourced contract) Remote

Senior iOS Engineer (Contract) · Jun 2022 – Dec 2022

PROJECT: Alchemy — digital gold MVP, R&D contract (Australian client, outsourced)

R&D outsourced contract during PASHA. Research and build: fintech MVP for tokenized gold.

- Delivered internal MVP with KYC, wallet, and buy/sell/exchange flows (TestFlight / internal builds, no App Store).
- Set up multi-env builds (dev/QA/UAT), TestFlight, and Keychain-based secure storage.

Senior iOS Engineer · Feb 2020 – Feb 2022

PROJECT: **Drinkit — coffee ordering app for an offline coffee chain**

Drinkit — coffee ordering app for an offline coffee chain. One of two iOS engineers during early App Store rollout (~8 coffee shops).

- Built ordering and drink customization flows and shipped App Store releases as one of two iOS engineers (~8 coffee shops in several countries).
- Split the app into SPM modules with MVP (Presenter) for new features and cleaner ownership.
- Integrated Apple Pay and loyalty into checkout and implemented live order tracking over WebSockets with a polling fallback.

iOS Developer · Jan 2019 – Feb 2020

PROJECT: **PLAYHERA — esports & gaming tournaments**

Built tournament screens for PLAYHERA (brackets, scores, live updates). Team of 2–3 iOS devs per squad.

- Built tournament flows for teams and solo players: brackets, scores, chat, leaderboards.
- Live match and bracket updates over WebSockets. Handled disconnects and retries.
- Built UIKit screens for rosters, scores, leaderboards, and player profiles.
- Used Combine for view models and live updates in tournament and chat flows.

Auto Layout

Electus Kyiv, Ukraine

iOS Developer · Jul 2018 – Nov 2018

PROJECT: **Electus — crypto market info & wallet MVP**

Main iOS engineer on an early crypto wallet MVP for users new to crypto. Led architecture and first release in a team of two. Mentored a junior engineer.

- Built an MVP with market info and wallet flows. Shipped the first version.
- Used secure storage and TestFlight for internal builds.

GBKSoft Kyiv, Ukraine

[Company website](#) · [LinkedIn](#)

iOS Developer · Jun 2017 – Jun 2018

PROJECT: **Eastern Union — Broker Tool**

Agency work on several client apps: Eastern Union (broker tool), Clovis Culture (online store), and a Bluetooth/iBeacon app. Team of 2–3 iOS engineers.

- Built underwriting UI with calculator-style flows for a broker tool.
- Built shop screens and purchase flows for an online store app.
- Shipped a Bluetooth/iBeacon app with location-based UX.
- Supported App Store releases: fixes, testing, and performance work.

Early career — learning, freelance & independent delivery Kyiv, Ukraine

Freelance & independent

iOS Developer · Dec 2013 – May 2017

PROJECT: **Self-study, trainee & junior roles, freelance-style and indie App Store work**

Early iOS career: indie apps and small client projects. Built, submitted, and updated apps in different areas.

- Self-study from 2013, then trainee and junior roles with hands-on work.
- Shipped small App Store and client apps in mobility, wellness, commerce, and games.
- Full cycle: build features, submit to App Store, update after user feedback.

Projects

Umico → Birmarket — Super App / Marketplace [App Store](#)

PASHA Holding

Swift · SwiftUI · UIKit · Swift Concurrency · SPM · URLSession · Firebase · Remote Config · XCTest

Marketplace super app with loyalty and a shared SDK used in several apps.

- SPM modules (core + features) so teams can work in parallel.
- Shared marketplace/loyalty SDK with themes and localization for several apps.
- New screens in SwiftUI. Old UIKit parts still work.
- Remote Config for step-by-step releases. Unit test coverage for critical business modules.

Drinkit — Coffee Ordering App [App Store](#)

Dodo Brands

Swift · UIKit · SPM · URLSession · WebSockets · Apple Pay

Coffee ordering app for an offline chain: drink setup, loyalty, and live order tracking.

- SPM modules with clear split between features.
- Live order tracking with WebSockets and polling backup.

- Apple Pay and loyalty in ordering flows.

PLAYHERA — Gaming Tournaments [App Store](#)

Solvve

Swift · UIKit · Auto Layout · Combine · URLSession · REST · WebSockets

Tournament platform with brackets, scores, and live match updates.

- Tournament flows for teams and solo players: setup, brackets, scores, progress.
- Multi-step tournament screens and leaderboards in UIKit.
- Combine view models for live tournament events, chat, and scores.
- Live scores and brackets over WebSockets with reconnect logic.

Eastern Union — Broker Tool [App Store](#)

GBKSoft

Swift · UIKit · REST · Foundation

Real-estate broker tool with calculator-style modules for quick deal checks.

- Built deal UI with financial calculators (cap rates, mortgage, IRR).
- Loaded data and ran calculations on device for quick “what-if” checks.
- Shipped App Store updates with focus on stability on data-heavy screens.

| Other projects

AlphaSMS

Objective-C · UIKit · REST · Push Notifications

[App Store](#)

SMS marketing app — campaigns, bulk messages, and client tools.

Green Riding Hood — Interactive Book

Objective-C · iMessage Extension

[App Store](#)

Read-aloud story with animations, gestures, interactive scenes, and an iMessage extension.

News reader

Objective-C · UIKit · Foundation · REST

Ukrainian news app: feed from several sources, read/unread state, and a “read later” list.

Flip Taxi

Objective-C · MapKit · UIKit · REST · Push Notifications

First taxi MVP for Latvia: order a ride and track the car on the map in real time.

Alert Meditation

Objective-C · UIKit · AVFoundation · Alamofire · UserNotifications

Meditation app for NY police workers: reminders after hard shifts, guided audio, simple program picker.

Tap4Parking

Objective-C · MapKit · UIKit · REST · Alamofire · Push Notifications

[Facebook](#) · [App Store](#)

Parking app for Kyiv: find parking in real time, pay, and book. Built search, navigation, booking, and payment flows.

Acucharting — 3D acupuncture planner

Alchemy — Digital Assets & Precious Metals

iPad · SceneKit · Core Graphics · Objective-C

[LinkedIn](#)

iPad app for acupuncture doctors: notes, calendar, and needle points on a 3D body model.

Swift · Stripe iOS SDK · Keychain · LocalAuthentication · MVVM · Swinject · SPM · Firebase

R&D contract · Jun–Dec 2022. Internal MVP for Australian gold client (TestFlight, no App Store): KYC, wallet, buy/sell flows. Multi-env builds.
