

Max Vilchevskiy

Senior iOS Engineer

Kyiv, Ukraine · Available Jul 2026

[Email](#) · [Telegram](#) · [LinkedIn](#) · [Portfolio](#)

Summary

Senior Software Engineer with 10+ years of commercial iOS experience across startups, indie apps, and large-scale marketplace platforms. Expanding beyond iOS with AI as an integral part of engineering practice. Known for product ownership from greenfield launch through long-lived production systems, including transforming Premium Subscription into a multi-host SDK adopted across host apps. Experience spans marketplace and loyalty, coffee ordering and consumer e-commerce, fintech client delivery, and Voice AI R&D on watchOS. AI tools and coding agents are part of everyday engineering workflow for development and learning.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency · SPM · Multi-host SDK · Modularization

Experience

- **Senior iOS Engineer · GlobalLogic** Jan 2026 - Jun 2026
Apple Watch Voice AI. R&D / demo · custom emergency on watchOS
 - Built the watchOS conversation UI for a voice-first companion for field workers operating hands-free.
 - Implemented an iPhone relay for real-time WebSocket and audio under watchOS runtime constraints.
 - Implemented structured AI command flows that map assistant responses to on-device app and UI actions.
 - Evaluated VelocityAI while delivering iOS/watchOS features.*watchOS · WatchConnectivity · Realtime Audio · AI Command Flows*
- **Senior iOS Engineer · PASHA Holding (Birmarket)** Apr 2022 - Jan 2026
Birmarket. Marketplace and loyalty · ~20+ iOS · ~50+ mobile
 - Took primary iOS ownership of Premium Subscription as a product feature, evolved it beyond a single in-app surface, and later reimplemented it as a configurable multi-host SDK with shared analytics.
 - Contributed to modularizing a large iOS codebase and diagnosing memory and UI performance issues in production.
 - Delivered marketplace and loyalty flow updates on iOS during the Umico to Birmarket expansion in Azerbaijan.*Multi-host SDK · Modularization · Analytics Infrastructure · Performance & Runtime Diagnostics*
- **iOS Engineer · Drinkit** Feb 2020 - Feb 2022
Drinkit. Coffee ordering · ~10+ startup · offline staff also tested
 - Built the iOS app from scratch with the launch team.
 - Implemented and evolved drink customization while helping refine user flows and scenarios.
 - Helped design and integrate contextual offers, including offer mechanics and client-backend data flow; backend services determine the final offer.*UIKit · Product Customization · Contextual Offers*

Earlier iOS experience

Earlier commercial iOS work included a mobile client for a gold-backed digital asset product linked to physical gold (buy/sell, price chart, Stripe), an esports competition platform (PLAYHERA, team management, RxSwift), and

foundational product/client delivery from 2013.
