

Max Vilchevskiy

Senior iOS Engineer

Kyiv, Ukraine · Remote · vil4max@gmail.com · vil4max.github.io · linkedin.com/in/vil4max · github.com/vil4max

Summary

Senior iOS product engineer with 10+ years of experience building customer-facing mobile products from early product ideas and new-business launches through continuous product evolution. Worked close to product and user scenarios as products evolved, while also contributing to large-codebase modularization and turning primary feature responsibility into shared mobile infrastructure. Recent work extends this background into watchOS, realtime voice/audio client paths, and structured AI command flows.

Skills

Swift · SwiftUI · UIKit · Swift Concurrency · watchOS · Objective-C

English: Upper-Intermediate (B2)

Experience

Senior iOS Engineer · GlobalLogic · Jan 2026 – Jun 2026

Apple Watch Voice AI — voice-first companion R&D for field workers

- Built the watchOS conversation experience for a voice-first companion designed for hands-occupied field scenarios.
- Implemented an iPhone relay for realtime WebSocket and audio communication, keeping the conversation UI on Apple Watch under watchOS runtime constraints.
- Worked on structured AI command flows where assistant responses were interpreted on-device and mapped to application and UI actions.
- Evaluated VelocityAI through hands-on iOS delivery scenarios, reviewing specification and design context through implementation workflows.

watchOS · WatchConnectivity · Realtime Audio · AI Command Flows

Senior iOS Engineer · PASHA Holding (Birmarket) · Apr 2022 – Jan 2026

Birmarket — consumer marketplace & loyalty

- Worked on the iOS product as the marketplace evolved from an earlier-stage product into a large production commerce and loyalty platform in Azerbaijan.
- Worked across evolving marketplace and loyalty flows, adapting customer-facing iOS journeys and navigation as product scenarios expanded.
- Contributed to the evolution and modularization of a large production iOS codebase, including hands-on runtime diagnostics for memory and UI performance issues.
- Took primary iOS responsibility for Premium Subscription, evolved it beyond an in-app feature, and later reimplemented it as a configurable multi-host SDK with shared analytics infrastructure.

Multi-host SDK · Modularization · Analytics Infrastructure · Performance & Runtime Diagnostics

iOS Engineer · Drinkit · Feb 2020 – Feb 2022

Drinkit — consumer coffee ordering for physical coffee shops

- Built the production iOS product from scratch as part of the team launching a new consumer business, working from early product ideas and real commercial constraints.
- Implemented and evolved drink customization while contributing to user-scenario exploration and refinement of customer-facing product flows.
- Participated in designing and integrating contextual offers, contributing to offer mechanics and client/backend data-flow decisions.

Product Customization · Contextual Offers

Earlier iOS experience

2013–2018: Product and client iOS development across multiple domains.
